About Us

At Sortcon, we understand that optimizing your intralogistics operations is crucial to your business success. Our range of innovative products, including telescopic conveyors, roller conveyors, belt conveyors, elevator conveyors and pop-up conveyors are designed to streamline your warehouse processes, reduce labor costs and increase efficiency. With our cutting-edge technology and deep scientific expertise, we can help you identify the bottlenecks in your operations and provide customized solutions to overcome them. Whether you need to improve throughput, reduce errors or enhance safety, Sortcon is your trusted partner for intralogistics excellence.

Why?

At Sortcon, we're more than just a component provider. We're a partner that's committed to helping your business succeed. We work closely with our clients to understand their unique needs, challenges and we tailor our solutions to meet those needs.

So, if you're looking for a trusted partner in the intralogistics industry, look no further than Sortcon. Contact us today to learn more about how we can help your business thrive.

Mission

At Sortcon, our mission is to leverage our scientific expertise and cutting-edge technology to revolutionize the intralogistics sector. We are dedicated to providing businesses of all sizes with tailored solutions that optimize their intralogistics processes, streamline operations and increase efficiency and productivity. Through our commitment to scientific innovation, collaboration and a customer-centric approach. We strive to deliver superior results and enable our clients to stay ahead of the competition. Our goal is to be a trusted partner for businesses seeking to enhance their intralogistics capabilities and achieve their full potential in a rapidly evolving market.

Vision

At Sortcon, we are committed to revolutionizing the intralogistics sector through cutting-edge science, technology and a relentless focus on efficiency and productivity. Our vision is to be a leader in the industry, leveraging our deep scientific expertise and the latest advancements in automation, robotics and software to streamline operations, reduce costs and deliver superior results for our customers. Through our unwavering commitment to innovation, collaboration and a customer-centric approach. We strive to enable businesses of all sizes to optimize their intralogistics processes and achieve their full potential.

6 Standard Telescopic Conveyor (STC)

Standard Telescopic Conveyor (STC)

Telescopic conveyors are becoming an increasingly popular choice for logistics companies looking to improve their material handling operations. These innovative machines offer a wide range of benefits that can help logistics companies increase efficiency, reduce labor costs and improve safety in the workplace. By automating material handling tasks that would otherwise require manual labor, telescopic conveyors can help accelerate the operation of a warehouse and improve overall efficiency.

Technical Data

Main Body Width	3 BOOM			4 BOOM		
	BELT WIDTH + 400 mm			BELT WIDTH + 500 mm		
Main Body Length	4,000 mm	5,000 mm	6,000 mm	4,000 mm	5,000 mm	6,000 mm
Extension Length	4,000 mm	5,000 mm	8,000 mm	6,000 mm	10,000 mm	12,000 mm
Total Max. Length	8,000 mm	10,000 mm	14,000 mm	10,000 mm	15,000 mm	18,000 mm
Baggage Weight	up to 60 kg/m			up to 50 kg/m		
Conveyor Speed	up to 1m/s					
Belt Width	600 mm 800 mm 1,000 mm					

Here are some of the most common usage areas for belt conveyors:

- 1- Warehousing and Distribution
- 2- Manufacturing and Assembly
- 3- Airport Baggage Handling

Here are some data that highlights the benefits of using belt conveyors:

- 1- Improved Efficiency
- 2- Reduced Labor Costs
- 3- Space Savings
- 4- Improved Safety
- 5- Enhanced Productivity

Technical Data

Conveyor Length	670-30.000 mm	up to 10.000 mm
Conveyor Width	up to 1.500 mm	up to 1.000 mm
Baggage Capacity	up to 600 mm	up to 600 mm
Conveyor Speed	up to 2 m/s	up to 4 m/s
Baggage Weight	up to 60 kg/m	up to 32 kg/m

Standard Belt Conveyor (SBC)

The use of belt conveyors can have a significant impact on the efficiency and productivity of a warehouse. By automating material handling tasks, reducing labor costs, saving space, improving safety and enhancing productivity. Belt conveyors are an investment that can help businesses improve their bottom line and provide better service to their customers.

Here are some data that highlights the benefits of using roller conveyors:

- 1- Improved Efficiency
- 2- Reduced Labor Costs
- 3- Space Savings
- 4- Improved Safety
- 5- Enhanced Productivity

Technical Data

Conveyor Length	670-30,000 mm	up to 10,000 mm
Conveyor Width	up to 1,500 mm	up to 1,500 mm
Side Guide Height	up to 600 mm	up to 600 mm
Conveyor Speed	up to 2 m/s	up to 4 m/s
Baggage Weight	up to 100 kg/m	up to 32 kg/m

Standard Roller Conveyor(SRC)

Roller conveyors are a commonly used material handling solution in warehouses and distribution centers. By automating material handling tasks, roller conveyors can help accelerate the operation of a warehouse and improve overall efficiency.

Here are some of the most common usage areas for roller conveyors:

- 1- Manufacturing and Assembly
- 2- Warehousing and Distribution
- 3- Airport Baggage Handling

Roller-Lifting Equipment(RLE)

Elevator conveyors are a specialized type of conveyor that can help accelerate the operation of a warehouse or distribution center by improving the efficiency of material handling tasks.

Here are some data that highlight the benefits of using elevator conveyors:

- 1- Improved Efficiency
- 2- Reduced Labor Costs
- 3- Space Savings
- 4- Improved Safety
- 5- Enhanced Productivity

Technical Data

Conveyor Height	2,000-10,000 mm
Conveyor Width	up to 1,500 mm
Baggage Capacity	up to 10 (at the same time)
Conveyor Speed	up to 1 m/s
Baggage Weight	up to 60 kg/m

Pop-Up Roller Conveyor(PRC)

Pop-up conveyors are a specialized type of conveyor that can help accelerate the operation of a warehouse or distribution center by improving the efficiency of material handling tasks. Here are some data that highlight the benefits of using pop-up conveyors:

Technical Data (One Unit)

Unit Length	up to 2,000 mm
Unit Width	up to 1,500 mm
Baggage Capacity	up to 40 baggage/min.
Conveyor Speed	up to 2 m/s
Baggage Weight	up to 32 kg/m

- 1- Improved Efficiency
- 2- Reduced Labor Costs
- 3- Space Savings
- 4- Improved Safety
- 5- Enhanced Productivity

The use of pop-up conveyors can have a significant impact on the efficiency and productivity of a warehouse or distribution center.
